Moon, Planets and Stars
at

ASTRONOMY DAY

April 24, 2010

Harper College, Palatine

in co-operation with

The Northwest Suburban Astronomers

Explore the wonders of the universe... see the moon, planets, stars, and galaxies.

On Saturday, April 24th - RAIN or SHINE - we will host an informative and entertaining celebration of astronomy beginning at 5:30 pm.

If the skies are clear, telescopes will be available for viewing a variety of celestial objects.

NSA members will be on hand to answer any questions and conduct general tours of the night sky.

But don't stay away even if it's cloudy. Inside the school will be a wide variety of shows, demonstrations, and exhibits.

- Telescopes on Display
- Astronomy Lectures
- Campus Observatory
- Displays and Photographs
- Planetarium Dome
- Projects for Children

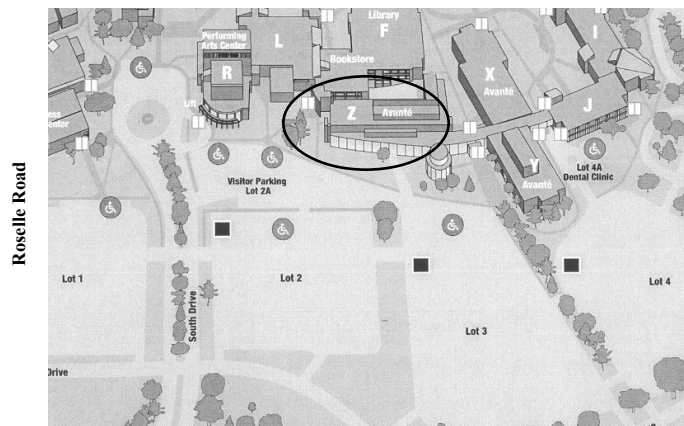

ALL AGES WELCOME
